

Agile Business Consortium
Scrum Master

TRAINING DATASHEET

"I equate Scrum to the game of chess. You can read the official rulebook for chess. The moves, players, sequences, scoring, etc. are all specified. Learn them. Then you can play chess."
by Ken Schwaber, co-creator of Scrum

COURSE SYPNOSIS

So, why Agile? The future is unpredictable, and with the world and its technology changing ever faster, it is creating greater uncertainty on our needs and requirements. Solution developments that embrace Agile are able to adapt faster, delivering little and often and remaining customer-focused. Popular agile methodology practiced globally, Scrum is a framework for developing, delivering and sustaining complex products through effective team collaboration.

The Agile Business Consortium Scrum Master course addresses the principles and theory underpinning the Scrum framework and the role of the Scrum Master. Training and certification are based on The Scrum Guide by Scrum creators Ken Schwaber and Jeff Sutherland. The course combines instruction and team-based exercises, purposefully designed to be less IT- and more wide business-focused.

Delegates will learn the role of Scrum Master, enabling them to lead a Scrum Team and drive adoption of the Scrum framework for more effective product and solution development. Through an experiential and fun class, participants learn the Scrum framework by working together in sprints. The exercises are designed to demonstrate the rules of Scrum and role of Scrum Master.

Participants are eligible to claim 14 PMI PDUs upon attending this course.

COURSE DURATION

2 Days

COURSE OBJECTIVES

- Gain a deep understanding of the Scrum theory, empiricism and lean thinking
- Understand in detail the role of Scrum Master and servant leadership
- Learn about the Scrum Team and accountabilities
- Master the Scrum rules to better understand their application when returning to the workplace
- Understand the Scrum Events, artifacts and commitment
- Prepare the students for PSM I certification exam.

OUTLINE

- Agile values and principles
- The Scrum framework
- Self managing and self organization
- Scrum theory, empiricism and lean thinking
- Scrum events
- The Scrum Team and accountabilities
- Artifacts and commitment
- Scrum Master deep dive.

WHO SHOULD ATTEND

This course is intended for anyone involved in product delivery using the Scrum framework. It will be particularly beneficial to those accountable for getting the most out of Scrum, including Scrum Masters, managers, and Scrum team members.

PRE-REQUISITES

There is no pre-requisite for the course. Some experience and awareness in project work as well as product or solution development would be advantageous.

CERTIFICATION EXAM BY AGILE BUSINESS CONSORTIUM

The Agile Business Consortium Scrum Master examination will be taken at the end of the course.

- 50 scored multiple choice questions
- Duration of 40 minutes
- 37 marks (74%) required to pass
- Closed book examination
- No negative marking for incorrect answers.

Participants who complete the course and pass the above exam will attain the Agile Business Consortium Scrum Master certification; this certification does not expire.
