COBIT
ASSESSMENT SERVICE

Understand your process capability and improve continually

The service helps you to assess the process capability based on COBIT. The approach is logical, repeatable and reliable. You can then establish a target for improvement based on business requirements.

KEY BENEFITS

⚠ Focusing on key areas and defining the key assessment drivers

⚠ Linking IT processes to organizational priorities

⚠ Following the standardized rating scheme

⚠ Knowing the factual evidence to support the capability rating

⚠ Base-lining the current process capability

⚠ Preparing towards the improvement roadmap (able to compare with the baseline in the future)

WHAT IS INCLUDED

The service leverages COBIT process reference model and ISO/IEC 15504 measurement framework. It is a standards-based approach and produce results
that support process improvement, prioritisation and planning.

Our experienced impartial consultants can help you to understand the approach in detail, decipher the results, and come up with an actionable improvement plan. The services may include:

⚠ Establish meaningful and prioritized assessment scope

⚠ Mapping the relevant IT processes to the objectives

⚠ Design and explain the capability rating scheme

⚠ Collect and obtain objective evidence

⚠ Provide comprehensive report(s)

⚠ Recommend an actionable improvement roadmap and plan
