

ITIL® 4 Specialist: Monitor, Support and Fulfil

Based on ITIL4

TRAINING DATASHEET

This module is structured and aligned to the ITIL4 practice management areas of Service Desk, Event Management, Incident Management, Service Request Management and Problem Management.

COURSE SYNOPSIS

The ITIL4 Monitor, Support and Fulfil course is designed to equip IT professionals with the knowledge and skills required to effectively monitor, support, and fulfil IT services in alignment with the ITIL4 framework. This course builds upon the foundational concepts of ITIL4 and focuses specifically on the activities involved in monitoring, supporting, and delivering high-quality IT services to meet organizational goals and stakeholder expectations.

Participants will explore the key principles and practices of ITIL4 in the context of monitoring, supporting, and fulfilling IT services. They will learn how to establish effective monitoring mechanisms to ensure service performance, availability, and capacity. Participants will also gain insights into incident management, problem management, and service request management practices, enabling them to efficiently resolve issues and fulfil service requests through channels such as Service Desk.

By the end of this course, participants will possess a comprehensive understanding of ITIL4 principles and practices related to monitoring, supporting, and fulfilling IT services. The course also includes guidance to measure practice capability levels and understand factors that correlate with practice success.
