

ITIL® 4 Specialist: Plan, Implement and Control

Based on ITIL4

TRAINING DATASHEET

This module is structured and aligned to the ITIL4 practice management areas of Change Enablement, Service Configuration Management, IT Asset Management, Release Management and Deployment Management.

COURSE SYNOPSIS

The ITIL4 Plan, Implement and Control course is designed to equip IT professionals with the knowledge and skills required to effectively plan, implement and control IT services in alignment with the ITIL4 framework. This course builds upon the foundational concepts of ITIL4 and aims to establish good cross-practice collaboration and effective service value streams in support of business objectives

Participants will explore the key principles and practices of ITIL4 in the context of planning, implementing and controlling IT services. Participants will gain deeper insights into change enablement, service configuration management, IT asset management, release management and deployment management practices with best practice guidance (centred around the four dimensions of service management) at both strategic, tactical and operational levels to maximise value from the ITIL4 practices.

By the end of this course, participants will possess a comprehensive understanding of ITIL4 principles and practices related to planning, implementing and controlling IT services. The course also includes guidance to measure practice capability levels and understand factors that correlate with practice success.

COURSE DURATION

3 Days Instructor-Led Classroom Training

COURSE OBJECTIVES

On completion of this course, the following learning outcomes will be achieved:

- ▲ Define the key concepts, principles, value and challenges of ITIL 4's five Plan, Implement and Control management practices
- ▲ Ensure stakeholders understand the strategic and operational requirements to co-create value and achieve business goals
- ▲ Integrate the practices in the organization's value streams
- ▲ Understand the interfaces and synergies across these five practices
- ▲ Apply metrics and practice success factors to improve performance
- ▲ Measure, assess and develop the capability of the various practices covered by using the ITIL Maturity Model

WHO SHOULD ATTEND

The target audience for this course and qualification are:

- ▲ ITSM managers, aspiring managers and practitioners developing their ITSM knowledge based on ITIL4
- ▲ ITSM practitioners that seek to validate their skills and knowledge in establishing effective cross-practice collaboration and value streams
- ▲ Individuals who are pursuing the ITIL Master designation

PRE-REQUISITES

Candidates must already have achieved ITIL4 Foundation certification to qualify to sit the examination.

CERTIFICATION

Participants of the course who successfully pass the certification examination will be awarded the ITIL 4 Specialist: Plan, Implement and Control certification

OUTLINE

▲ IT Asset Management Practice

- The key concepts of the practice.
- The processes of the practice.
- The roles and competences of the practice.
- How information and technology support and enable the practice.
- The role of partners and suppliers in the practice.
- How the ITIL® capability model can be used to develop the practice.
- The recommendations for the practice success

▲ Change Enablement Practice

- The key concepts of the practice.
- The processes of the practice.
- The roles and competences of the practice.
- How information and technology support and enable the practice.
- The role of partners and suppliers in the practice.
- How the ITIL capability model can be used to develop the practice.
- The recommendations for the practice success

▲ Deployment Management Practice

- The key concepts of the practice.
- The processes of the practice.
- The roles and competences of the practice.
- How information and technology support and enable the practice.
- The role of partners and suppliers in the practice.
- How the ITIL® capability model can be used to develop the practice
- The recommendations for the practice success

▲ Service Configuration Management Practice

- The key concepts of the practice.
- The processes of the practice.
- The roles and competences of the practice.
- How information and technology support and enable the practice.
- The role of partners and suppliers in the practice.
- How the ITIL® capability model can be used to develop the practice.
- The recommendations for practice success.

▲ Release Management Practice

- The key concepts of the practice.
- The processes of the practice.
- The roles and competences of the practice.
- How information and technology support and enable the practice.
- The role of partners and suppliers in the practice.
- How the ITIL® capability model can be used to develop the practice.
- The recommendations for the practice success.

▲ Plan, Implement and Control

- Understand the processes and value streams of the Plan, Implement & Control practices.
- How information and technology support and enable the practices.
- Recommendations for the Plan, Implement & Control practices success.

PRE-COURSE READING

There are no pre-course reading materials required for this course. A good grasp of ITIL4 fundamental concepts including but not limited to the Four Dimensions of Service Management is advantageous.

EXAMINATION FORMAT

▲ 60 Multiple Choice Questions

▲ 1 mark per correct answer

▲ 39 marks required to pass (out of 60 available) – 65%

▲ 90 minutes duration

▲ Closed-book
