

COBIT5[®] Assessor

TRAINING DATASHEET

An instructor-led classroom training relevant for professionals keen to perform process assessments, understand the results to provide a clear understanding of process capability in order to drive targeted improvements delivering increased value to the business.

COURSE SYNOPSIS

COBIT5 provides globally accepted principles, practices, analytical tools and models designed to help business and IT leaders maximize trust in, and value from, their enterprise's information and technology assets. COBIT5 provides guidance to executives and those charged with making decisions concerning the use of technology in support of organizational objectives. This framework helps business leaders address the needs of all stakeholders across the enterprise and ultimately maximize the value from information and technology.

COBIT5 integrates existing ISACA risk and value management frameworks into an established governance framework provided for in earlier versions of COBIT.

This instructor-led training enables process assessment and how to analyze the results to provide a clear determination of process capability. Participants will also learn how these results can be used for process improvement, measuring the achievement of current or projected business goals, benchmarking, consistent reporting and organizational compliance ultimately driving value to the business.
