

ISO/IEC 27001 Practitioner Information Security Officer

Based on ISO27001:2013

TRAINING DATASHEET

An instructor-led classroom training relevant for professionals who will play a leading role in the implementation of the Information Security Management System (ISMS) needed for compliance against the requirements of the ISO27001:2013 standard

COURSE SYPNOSIS

This course is a two-day classroom training relevant for professionals who play a role in establishing the ISO/IEC 27000 standard. This course is designed for IT professionals, consultants who play a role in the ISO/IEC 27000 implementation or in providing support around ISO/IEC 27000 certification.

Practical examples and case studies are used to guide you through the implementation route and prepare you to conduct a ISO/IEC 27000 assessment or audit. At the end of the two-day classroom training the APMG certification exam can be taken. This training does not cover audit techniques or the issues involved in preparing an organization for an audit.

COURSE DURATION

2 Days Instructor Led Classroom Training

COURSE OBJECTIVES

The purpose of the practitioner qualification is to confirm whether the candidate has achieved sufficient understanding of ISO/IEC 27001 and its application in a given situation.

On completion of this training course, delegates will be able to:

- ▲ Apply the principles of ISMS policy and its information security scope, objectives, and processes within an organizational context.
- ▲ Apply the principles of risk management including risk identification, analysis and evaluation and propose appropriate treatments and controls to reduce information security risk, support business objectives and improve information security.
- ▲ Analyze and evaluate deployed risk treatments and controls to assess their effectiveness and opportunities for continual improvement.
- ▲ Analyze and evaluate the effectiveness of the ISMS through the use of internal audit and management review to continually improve the suitability, adequacy and effectiveness of the ISMS.
- ▲ Understand, create, apply and evaluate the suitability, adequacy and effectiveness of documented information and records required by ISO/IEC 27001.
- ▲ Identify and apply appropriate corrective actions to maintain ISMS conformity with ISO/IEC 27001.

WHO SHOULD ATTEND

This qualification is aimed at those who are:

- ▲ Internal managers and personnel working to implement, maintain and operate an ISMS within an organization.
- ▲ External consultants supporting an organization's implementation, maintenance and operation of an ISMS.
- ▲ Internal auditors who are required to have an applied knowledge of the standard.

OUTLINE

- ▲ Introduction to and background of ISO/IEC 27000.
- ▲ The certification scheme.
- ▲ ISO/IEC 27000 Standards family overview
- ▲ ISO/IEC 27001 and Annex A in detail.
- ▲ The use and application of ISO/IEC 27000.
- ▲ The implementation of ISO/IEC 27000.
- ▲ Preparing for a formal audit.
- ▲ ISO/IEC 27000 scoping and applicability.
- ▲ Exam practice and preparations.

CERTIFICATION

Delegates who successfully completed the course and pass the exam will be recognized as “Practitioner – Information Security Officer” under the APMG certification scheme.

For those delegates who do not meet the requirements stipulated in pre-requisites stated above or fail the exam would be awarded a course attendance certificate only.
